

Bio Water InnovativeTM

Good Water And Good Life...

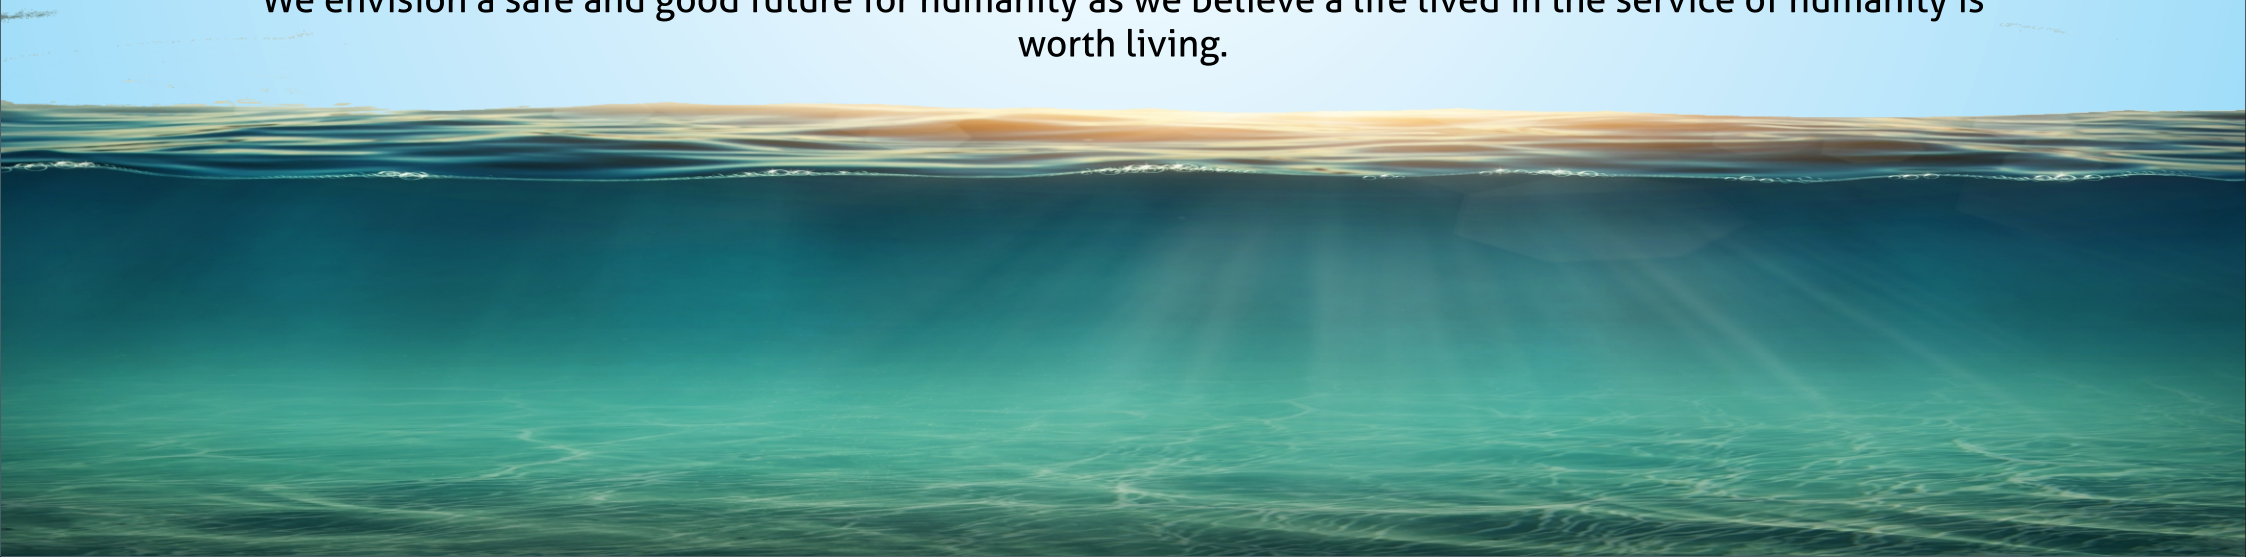

OUR MISSION SUCCESS BUSINESS

We believe in uninterrupted perfection, motivation to offer the most inspiring products and services available. Our company has a founding mantra of providing state of the art healthcare products that are best in its class, with in house research and development capabilities.

Our product range has been designed and developed with the sale motive of improving the health of every individual with little or no interference to the lifestyle through Air, Food and Water. We relentlessly evaluate our work in order to identify areas where we can improve. Our growth route is to conquer local, spread national and reach the international market. Our sole motive and goal are to serve humanity.

We are passionate about giving our best and doing the finest job possible while having fun performing it. We have the drive to exceed goals and expectations, both individually and collectively and we are rewarded for it. Our products are well received by our customers having a well developed local market and future projection of our company is to cater to international markets with a loyal customer base. To us, this is not just a job it is a passion for ensuring great health for the community at large.

We envision a safe and good future for humanity as we believe a life lived in the service of humanity is worth living.

Description

Bio Water Innovative Pure water helps you stay more hydrated ... 85% of our customers say they drink more water since having a Virgin Bowl Water System installed.

SPECIFICATIONS

Color White and Blue.

Application Water Purifier

Type SOR/ Virgin Foodgrade PVC Material

With clamp /w/o clamp Diamond cut /plan.

Material 100% virgin Poly-Propylene

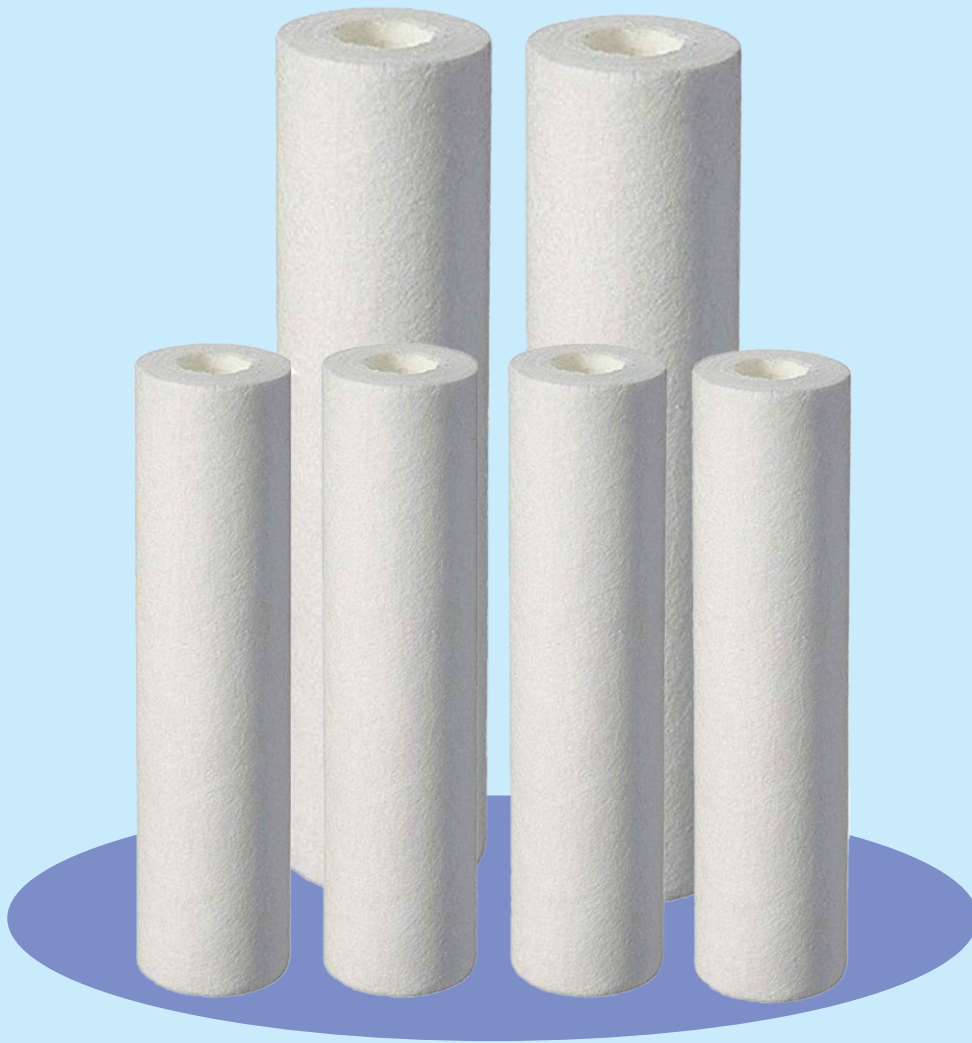

Gross Weight 330GM TO 450 GM.

Can hold Pressure up to 250 to 350 PSI

Temperature 55 deg C.

Packing : 50 Pcs Master Packing

Description

Bio Water Innovative High flow rates and low pressure drops. Particles remove through the entire depth of filter cartridge. Wide chemical compatibility. High dirt holding capacity

SPECIFICATIONS

Length : 10", 20", 30", 40"

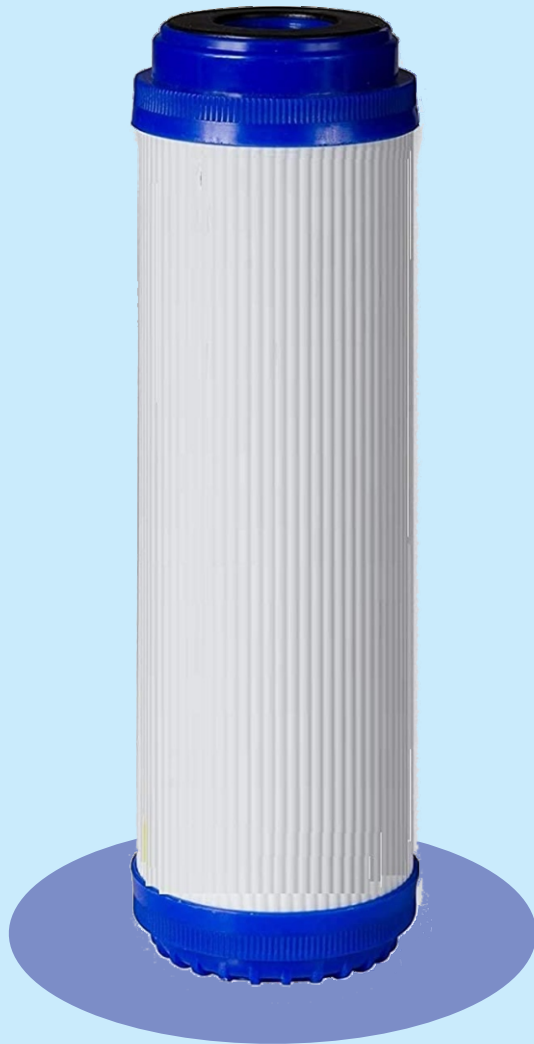

Micron: 0.0005.

Weight: 110Gm To 480Gm

Packing: 80 to 100 Pcs Master Box.

(Depending PP GM)

Description

Bio Water Innovative CTO is an acronym for Chlorine, Taste, and Odor. A filter recommended for CTO removal will produce water that is much clearer in color with a more appealing taste and elimination of odors.

SPECIFICATIONS

Material	: Activated Carbon
Diameter	: 5 cm
Color	: White
Length	: 10", 20"
Packing	: 50 Pcs Master Packing

Description

Bio Water Innovative FR flow restrictor, as the name suggests, restricts the flow of RO reject water. The flow restrictor maintains high pressure inside the RO membrane (a precondition for RO purification) by creating back pressure on the membrane and also controls the recovery ratio of the purifier.

SPECIFICATIONS

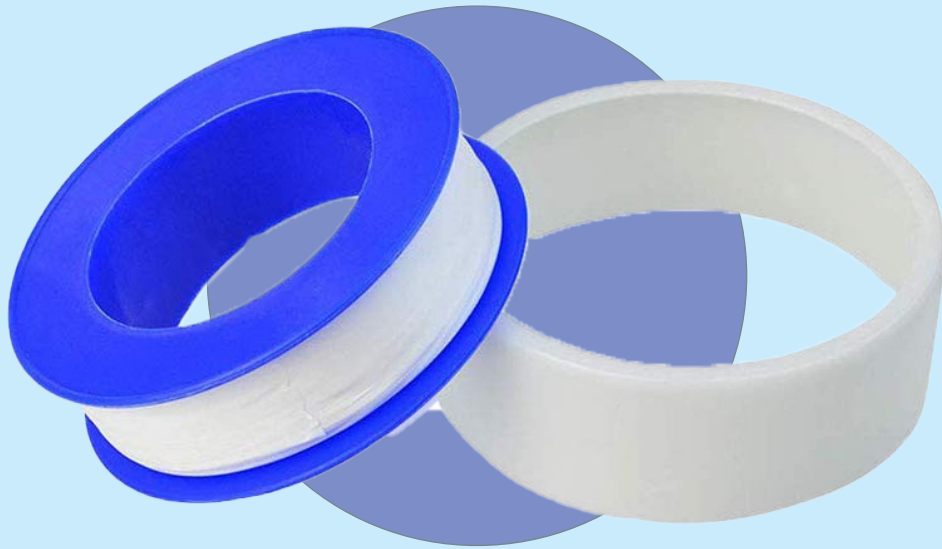

Power Source : Battery Powered

Capacity : 10 cubic Centimetres

Material : Plastic

Packing : 100 Pcs master box.

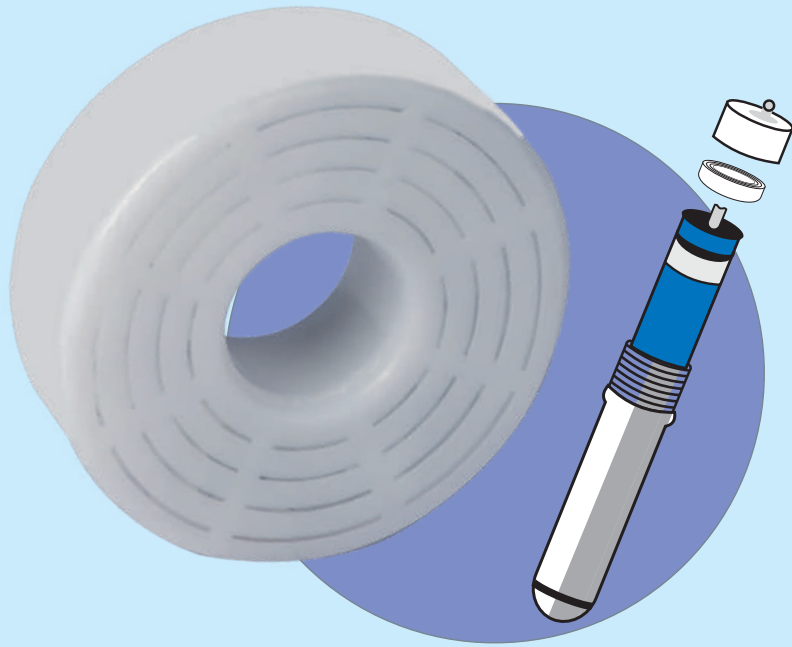

Description

Bio Water Innovative Teflon Tap It is pliable, bendy, and a non hardening material ideal for winding around the pipe threads, compression joints and other fittings.

SPECIFICATIONS

Feature	: Water proof
Material	: Plastic
Color	: White
Length	: 10 M And 15M.
Packing	: 100 Pcs Master Box

What does Bio Water Innovative Antiscalant Doser contain?

Bio Water Innovative Antiscalant Doser contains high grade Anti-scaling Crystals with food graded outer packing. These crystals help delay reaction between the bicarbonate and the calcium magnesium. This delay let's water pass through the membrane without having any chemical reaction which usually leads to scaling.

Why use an Antiscalant Doser?

Antiscalant Doser is a pretreatment product for domestic RO membranes. These dosers help reduce scaling on the membrane, enhancing life.

APPLICATION

Bio Water Innovative Antiscalant Dosers are made in shape to fit at the start of any domestic RO membrane. Use the Doser at the inlet of the RO membrane.

SPECIFICATIONS

• Shape	: Round
• Diameter	: 49.92mm
• Material	: Polypropylene
• Net weight	: 33 grams
• Life	: 25000 liters (depends on water quality)
• Packing	: 500 pieces in 1 master carton box

Description

Bio Water Innovative Pipes RO water purifier removes toxin such as lead, mercury, Fluoride, Arsenic, Chlorine which case human body to be ill. Lead metal can cause brain damage and anemia. RO water filter is great for removing commonly found Cryptosporidium in lake, river and public supply water

SPECIFICATIONS

Size	: ¼ Inch, 1 Inch, 2 Inch, 3 Inch
Application	: Water Flow Pipes
Color	: White, Blue
Connection	: Connector
Packing	: 100 Meter And 500 Meter Master Box

MEMBRANE HOUSING

Description

Bio Water Innovative Membrane housing is a pressure vessel for loading membrane elements in a reverse osmosis water treatment system. Currently, there are three types of membrane housings with different materials for water treatment on the market: FRP (fiberglass reinforce plastic), stainless steel and PVC. However, in recent years, more and more reverse osmosis water treatment systems have chosen to use FRP membrane housing. This is because the FRP membrane housing has a strong advantage in terms of pressure bearing capacity, design size, material properties and operating temperature compared to stainless steel and PVC membrane shells.

SPECIFICATIONS

Material : 100% Virgin Poly-Propylene

Weight : 230Gm to 260Gm

Pressure : Up to 300 PSI

Fitting : 1/4 Thread

Packing : 50 Pcs Master Box

PUMP HEAD

Description

Bio Water Innovative Pump head purpose of the reverse osmosis booster pump is to increase water pressure going into the RO unit. Reverse osmosis is a pressure-driven process. Small residential RO units will theoretically operate on very low pressure--down to 35 psi, according to some membrane makers--but the reality is, you won't get a lot of water and the product water quality will be compromised if the unit runs below 45 psi. Low inlet pressure makes the unit produce more reject water, produce less drinking water, fill the storage tank more slowly, and produce lower quality water. RO units run well on typical city water pressure of 60 psi, but they run even better with a small pump to boost the pressure to 80 psi or higher.

SPECIFICATIONS

Application	: Ro Pump
Material	: Steel
Color	: white, Black
Weight	: 75 Gm
Height	: 10 cm
Surface Finish	: Color Coated
Packing	: 10 Pcs Master Box

Description

Bio Water Innovative Ro Cabinet Reverse osmosis helps in improving the quality and safety of water for domestic as well as for industrial use. It is widely used to desalinate the sea water. Reverse osmosis helps in removing many types of suspended and dissolved species from water. It helps in removing bacteria and removes the impurity of the water.

SPECIFICATIONS

Capacity : 12Liters, 15 Liters, 18 Liters

Application : RO Water Purifiers

Material : High Quality Food grade

ABS/SAN Material

Packing : 10 Pcs Master Box.

User friendly and attractive models

Available in various attractive colors.

Easy Maintenance.
